

Tor Borgen

CTO & IT Project Manager | Product Owner | Technical Leader

linkedin.com/in/torborgen | Norway

Professional Summary

Experienced technical leader with a hands-on development background and a record of leading complex IT initiatives from discovery to delivery. Brings a practical blend of project leadership, product ownership, Scrum, enterprise integration, and operational service experience.

Technical & Leadership Proficiencies

Leadership & Delivery: IT project management, product ownership, Scrum, agile delivery, roadmaps, stakeholder management

Technology: React, Node.js, TypeScript, PHP/Laravel, Azure, Google Cloud, Kubernetes

Integrations: REST APIs, WITSML, Azure APIM, oData, enterprise data hubs

Operational Foundation: Technical support, quality assurance, workflow improvement, customer service

Languages: English (full professional), Norwegian (native)

Professional Experience

CVM Solutions | Oct 2023 – Present

Chief Technology Officer

- Lead full-stack development and technical strategy for high-performance transaction platforms handling 10,000+ daily transactions.
- Built scalable automation and distribution infrastructure with a focus on performance, security, and a 30% reduction in distribution costs.
- Own end-to-end architecture, delivery, and technical leadership for complex product initiatives.

Keystone.no | Jul 2024 – Feb 2025

Product Owner

- Owned API-driven integration initiatives spanning WITSML, a central data hub, and enterprise APIs; contributed hands-on to architecture and delivery.
- Aligned stakeholders, roadmap priorities, and requirements to deliver major technical projects on time.

Keystone.no | Nov 2023 – Sep 2024

Technical Project Manager

- Led scoping, delivery, and cross-functional coordination for technical projects across engineering, data, and client teams.

Keystone.no | Aug 2021 – Nov 2023

Scrum Master / Technical Lead

- Scaled Scrum practices across development teams, introduced Jira automations, and improved delivery predictability and code-quality workflows.
- Led technical development, including a React legacy rewrite and Kubernetes implementation.

Muuh AS | May 2019 – Aug 2021

Technical Lead / Developer

- Progressed from React development to full-stack technical leadership; modernised legacy systems and delivered customer-facing integrations.
- Led Azure/Google Cloud migration work, a React Native rewrite, and integrations using Azure Functions, APIM, and oData.

Earlier Technical Experience

NextGenTel | Sep 2010 – Oct 2014

Back Office Employee

- Delivered advanced technical support across xDSL, fibre, VoIP, IPTV, networking, webmail, and mobile-broadband services.
- Resolved complex chat and premium-support cases and advised customer-support colleagues on technical troubleshooting and escalations.

NextGenTel | Sep 2009 – Sep 2010

Customer Support

- Diagnosed customer issues involving xDSL and fibre connections, webmail, and home-network configuration in a high-volume support environment.

IBM, Ireland | Jan 2009 – Aug 2009

Assistant Team Lead

- Supported daily service operations through queue monitoring, reporting, workflow coordination, team support, and process-improvement initiatives.

IBM, Ireland | Sep 2007 – Aug 2009

Technical Support / Quality Assurance

- Provided technical support for Nordea users across Active Directory, Exchange, Microsoft Office, mainframe, and ATM-related systems; contributed to service-quality assurance.

Selected Projects

Enterprise Data Hub & WITSML Integrations (Keystone.no) – Technical project management and hands-on delivery of API-driven enterprise integrations. Tech: Node.js, Azure APIM, WITSML, REST APIs, Azure Data Lake

Frontend Rewrite & Kubernetes Migration (Keystone.no) – Led a React modernisation and Kubernetes implementation. Tech: React, TypeScript, Jest, Azure

Transaction Platforms (CVM Solutions) – Led architecture and delivery of scalable automation platforms. Tech: Node.js, React, cloud infrastructure
